

Frontend Guidelines

Design System Aesthetic

- **Vibe:** Premium, modern fintech fused with high-utility agronomy. Clean, uncluttered, and highly legible.
- **Bilingual Accessibility:** UI elements should feature dual-language support (English primary, Kannada secondary subtitles).
- **Typography:** Geometric sans-serif (e.g., *Inter*, *Outfit*, or *Plus Jakarta Sans*). High contrast between headers and data metrics.

Color Palette

- **Primary Accent:** Deep Forest Green (#1B4332)
- **Background:** Off-White / Sand (#F8F9FA)
- **Surface / Cards:** Pure White (#FFFFFF)
- **Warning/Action Required:** Terracotta Red (#E07A5F)
- **Success/Optimal:** Emerald Green (#2D6A4F)

Component Architecture

- Rounded corners (16px border radius) on all primary cards.
- Soft, diffused drop shadows (`rgba(0, 0, 0, 0.05)`) for elevation.
- Bottom-sheet modals for secondary actions (e.g., Disease Diagnostic Card) to avoid losing navigation context.
